How To Play The Quiz

There are two types of questions in this quiz. The first type is a multiple choice question where you have to select the correct answer from a list of options. The second type is a true or false question where you have to select whether the statement is true or false. The quiz will be over when you have answered all the questions. You can exit the quiz at any time by clicking the 'Exit Quiz' button. You can also continue the quiz by clicking the 'Continue' button.

Javascript Quiz Application

Time Off

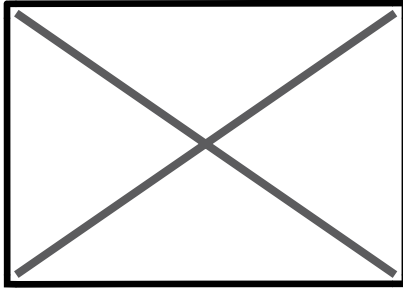

30

There are many ways to create a quiz application. One way is to use a library like `jQuery` to handle the DOM manipulation. Another way is to use a framework like `React` to build a component-based application. A third way is to use a library like `lodash` to handle the data manipulation. A fourth way is to use a library like `moment` to handle the date manipulation. A fifth way is to use a library like `axios` to handle the API calls. A sixth way is to use a library like `socket.io` to handle the real-time communication. A seventh way is to use a library like `express` to handle the server-side logic. An eighth way is to use a library like `mongoose` to handle the database operations. A ninth way is to use a library like `passport` to handle the authentication. A tenth way is to use a library like `bcrypt` to handle the password hashing.
